

FAST FACTS

Corporate Overview

Linguistic Agents Ltd. was founded in 1999 with the goal to develop the latest linguistic theories into practical technologies that will enable computers to understand human language and context. The Company's breakthrough **Streaming Logic** technology, the fruit of several years of intensive R&D, is designed for deployment as a Natural Language Understanding (NLU) Platform for commercial usage.

Fast-Growth Target Markets

Streaming Logic offers the potential to revolutionize the user experience in several markets, including:

- Internet Search
- Website Navigation
- Online Advertising
- Information Retrieval
- And others

Streaming Logic enables users to communicate with computer programs in a more intuitive, natural fashion.
